### DETAILED ACTION

Any rejections and/or objections, made in the previous Office Action, and not repeated below, are hereby withdrawn.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

#### *Claim Rejections - 35 USC § 103*

Claims 1, 2, 5-7, 9, 10, and 13-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Choudary et al. (US 6,087,289).

Choudary et al. (US 6,087,289) discloses an oxygen selective adsorbent composition and a process of preparing such a composition. Suitable zeolites include Zeolite X and an example uses Na-X zeolite as the starting material (column 4, lines 10-20). It is taught that the exchange is carried out with a 1-10 wt% cerium salt solution at a temperature of 30-100°C for 4-48 hours (column 4, lines 50-60). These ranges of time and temperature overlap the presently claimed time and temperature, and overlapping ranges have been held to establish *prima facie* obviousness. See MPEP 2144.05.

In an example, cerium chloride is used as the cerium salt and the exchanged zeolite is filtered, and washed with hot distilled water (Example 5). Note that the reference refers to NaX powder prepared earlier, i.e. in example 1, and does not contain a clay or organic binder (Example 5). The reference details that the composition is first dried in air at a temperature of 28-32 degrees C for 6-18 hours, followed by calcination at 450-700 degrees C for 2-18 hours (column 5, lines 1-15).

It is noted that the reference requires the presence of additional steps whereas instant claims 1 and 9 employs "consisting essentially of" claim language. "Consisting essentially of" claim language limits a claim to the recited ingredients and any ingredients which do not materially affect the novel and/or basic characteristics of the invention. See MPEP 2111.03. There is nothing of record to suggest that the addition of the additional steps of the reference affects the novel and/or basic characteristics of the present invention.

### ***Response to Arguments***

Applicant's arguments with respect to claims 1, 2, 5-7, 9, 10, and 13-15 have been considered but are moot in view of the new ground(s) of rejection.

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit: 1755

however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
